

INTRANET: NURSING RESOURCES AND CARE METHODS

The screenshot shows the Intranet homepage of the Centre intégré universitaire de santé et de services sociaux de l'Ouest-de-l'Île-de-Montréal (CIUSSS). The browser toolbar at the top has a red circle around the Home icon. A red line extends from this circle down to the Home icon in the Intranet navigation bar. The main banner features the 'AWARDS OF EXCELLENCE 2024' with a deadline to submit nominations on October 27, 2023, at 4 p.m. Below the banner is a 'News and events' section with two articles: 'October 23, 2023 : SMRC Breast Cancer Research : Putting patients first' and 'The Climate Fresk workshop - November 2nd, 2023'. A 'YOUR DAILY ESSENTIALS' sidebar on the right contains links to the 'Phone Directory' and 'Useful email addresses and phone numbers'.

Tips!

1 Searching in the Ottawa Hospital's guide:
Click the link to open the document. Once the document is open, type CTRL+F to access the search bar.

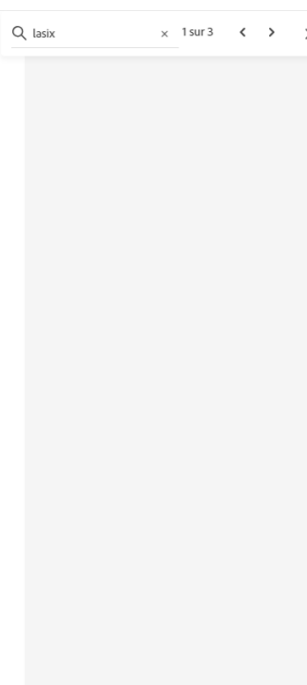

2 In the search bar, enter the name of the medication you're looking for.

3 Press ENTER on your keyboard.

Scroll through the results to get the complete medication profile and safe administration technique.

CIUSSS ODIM – Parenteral Drug Therapy Manual – Ottawa Hospital – 39th Edition – 2018

PARENTERAL DRUG THERAPY MANUAL	
OTHER NAMES Lasix ®	NAME OF MEDICATION FUROSEMIDE
	CLASSIFICATION Diuretic
INDICATIONS - Treatment of edema (diuretic effect) associated with congestive heart failure, renal disease (including the nephrotic syndrome) and hepatic cirrhosis when oral therapy is not feasible. - Adjunct in treatment of acute pulmonary edema. - To increase renal excretion of calcium in the setting of hypercalcemia.	
ADMINISTRATION - IV direct: physician or RN; maximum dose to be given direct is 100 mg. Administer over 2 minutes. - Intermittent IV infusion: dilute in 50-250 mL of D5W, NS or RL. Doses greater than 100 mg must be given at a rate not exceeding 4 mg/min. - IM. - SC, SC infusion (palliative care).	
POTENTIAL ADMINISTRATION HAZARDS - Hypersensitivity: rash, pruritus, urticaria, dermatitis, angioedema, anaphylaxis, interstitial nephritis and cutaneous vasculitis. - GI: nausea, vomiting, anorexia, diarrhea. - CNS: blurred vision, dizziness. - Electrolyte and fluid disturbances: hypokalemia, hypochloremia, hypomagnesemia, hypocalcemia, hyponatremia, hypovolemia; may cause postural hypotension. Elderly and sodium-restricted patients are more susceptible. - Deafness (reversible), hearing impairment (reversible or permanent) or tinnitus with large parenteral doses administered rapidly. - Hyperglycemia in diabetics, hyperuricemia. - Local reactions: transient pain (IM injection) and thrombophlebitis (IV administration).
